

RESOURCE[®] COMMANDER

Datasheet: StarBuilder Level 1 Payroll Adaptor

ACS Connect provides resource tracking capabilities to customers of AMSI's StarBuilder construction accounting software. For over 20 years, we have helped hundreds of AMSI customers get the most out of their systems. Resource Commander is fully integrated with StarBuilder, allowing employee time to be tracked remotely, costed, validated and finally fed directly into the Payroll application. Time can be fully distributed within Resource Commander while at the same time validated directly against StarBuilder, eliminating costly mistakes. Additionally, this integration eliminates the time intensive re-keying of payroll data.

Feature Summary

- Employee Resources are populated automatically within Resource Commander from the StarBuilder Payroll module.
- During time entry, all job costing validations are provided to the user directly from StarBuilder, eliminating potential costing errors.
- A second validation hierarchy is also provided, and can optionally be configured to provide human resources organizational units like divisions or departments.
- Pay rates and union codes may also be provided to the user directly from the StarBuilder Payroll module.
- Separate permissions are provided for personal entry, group entry, approvals, reporting and upload. Administrators can allow permissions to in any combination to the desired roles.
- Records can be selectively uploaded as a Payroll Batch to the StarBuilder Payroll application, prepared for proof and release.
- Employee hours are uploaded with Earnings Codes 00 – 02. Currency entered is uploaded as Earnings Code 07.

System Requirements

Server components of Resource Commander require the following minimum specifications:

- Processor: 1.5 GHz Pentium 4 or faster
- Memory: 2GB RAM
- Operating System: Microsoft Windows Server 2003
- Database: Microsoft SQL Server 2005 or SQL Server 2005 Express
- Other: Internet Information Services (IIS) 6 or 7

NOTE: While it is possible to install database and IIS on a single server, it is recommended that these components are each installed on a dedicated server.

StarBuilder must be installed on a network accessible server. Current operating system service packs are strongly recommended.

RESOURCE[®] COMMANDER

Datasheet: StarBuilder Level 2 Payroll Adaptor

ACS Connect provides resource tracking capabilities to customers of AMSI's StarBuilder construction accounting software. For over 20 years, we have helped hundreds of AMSI customers get the most out of their systems. Resource Commander is fully integrated with StarBuilder, allowing employee time to be tracked remotely, costed, validated and finally fed directly into the Payroll application. Time can be fully distributed within Resource Commander while at the same time validated directly against StarBuilder, eliminating costly mistakes. Additionally, this integration eliminates the time intensive re-keying of payroll data. In addition to all of the features in the Level 1 Adaptor, the Level 2 Adaptor provides the ability to track the operation of equipment through payroll.

Feature Summary

- Employee Resources are populated automatically within Resource Commander from the StarBuilder Payroll module.
- During time entry, all job costing validations are provided to the user directly from StarBuilder, eliminating potential costing errors.
- A second validation hierarchy is also provided, and can optionally be configured to provide human resources organizational units like divisions or departments.
- Pay rates and union codes may also be provided to the user directly from the StarBuilder Payroll module.
- Equipment IDs are also populated automatically from StarBuilder. For each detail line using the Hours Entry Code, a piece of equipment can be selected.
- Separate permissions are provided for personal entry, group entry, approvals, reporting and upload. Administrators can allow permissions to in any combination to the desired roles.
- Records can be selectively uploaded as a Payroll Batch to the StarBuilder Payroll application, prepared for proof and release.
- Employee hours are uploaded with Earnings Codes 00 – 02. Currency entered is uploaded as Earnings Code 07.
- Equipment operation and repair time is uploaded as appropriate to Earnings Codes 40 – 42 and 50 – 52.

System Requirements

Server components of Resource Commander require the following minimum specifications:

- Processor: 1.5 GHz Pentium 4 or faster
- Memory: 2GB RAM
- Operating System: Microsoft Windows Server 2003
- Database: Microsoft SQL Server 2005 or SQL Server 2005 Express
- Other: Internet Information Services (IIS) 6 or 7

NOTE: While it is possible to install database and IIS on a single server, it is recommended that these components are each installed on a dedicated server.

StarBuilder must be installed on a network accessible server. Current operating system service packs are strongly recommended.
