

# RESOURCE COMMANDER

## Why IT Managers Prefer Resource Commander

### Multiple Collection Options, One Back End

- ✓ Windows based installed client includes local caching for offline use
- ✓ Browser based Personal Entry interface for on-demand access from anywhere
- ✓ Platform independent mobile interface works in any standards compliant web browser
- ✓ Touchscreen TimeClock Client
- ✓ Biometric Ethernet Timeclock
- ✓ Employee ID Card Swipe

### Resource Commander is Optimized for the Enterprise

- ✓ Distributable Multi-tier Architecture
- ✓ Active Directory integration allows Single Sign On
- ✓ Click-Once Deployment to ensure seamless and timely updates
- ✓ Environment abstraction layer separates enterprise administration from environment administration
- ✓ Performance-tuned database for efficient handling of millions of records

### Advanced Administration for Environment-Specific Configuration

- ✓ Capable of unlimited environments with no redundant user setup
- ✓ Environment-specific soft labeling
- ✓ Environment-specific organizational and costing hierarchies
- ✓ Environment-specific role based permission configuration
- ✓ Environment-specific user interface controls
- ✓ User-defined fields available in all System Modules

### Fully Extensible and Developer Ready

- ✓ SDK includes documented DLL for accessing data layer
- ✓ Custom reports can be developed with SQL Report Writer
- ✓ Access to custom reports and data-level security can be managed within Resource Commander's built-in reporting permission framework
- ✓ Event-triggered actions can be scripted (VB.Net) within administrative interface
- ✓ Turnkey integration to ERP and Project Management applications
